

# MerIT

# Net Assess

What will they find... when they find you?

## Comprehensive Penetration Testing and Remediation

Available in three levels, MerIT's Net Assess delivers comprehensive vulnerability and penetration testing of external attack surfaces and internal networks, provides detailed reports on findings, and remediation for troubled areas.

### *Net Assess Level I - External Attack Surface*

- Internet facing scans with comprehensive reports
- Work with staff and vendors to remove unnecessary vectors and secure required vectors
- Remediate existing vulnerabilities

### *Net Assess Level II - Internal Pen-Testing*

- Vulnerability and penetration testing of internal network devices, hosts, and devices
- Comprehensive reporting of findings and action items

### *Net Assess Level III - Remediation*

- Work with staff and vendors to resolve discovered vulnerabilities (bios/firmware updates, host patching/updates, 3rd party vulnerabilities)
- Provide security centric review of network, systems, design, operations, and practices and procedures

### *Power Behind the Service*

- Internal and External vulnerability and penetration testing leveraging OpenVAS with tens of thousand of up to date plugins and definitions
- Exhaustive scanning of internal hosts, Systems, and devices
- Exhaustive port categorization
- 256-bit SSL/TLS encrypted communications
- AES 256 encrypted data
- Comprehensive reporting including attack surface mapping, per-host exposure, CVE & vulnerability specific identification and action points
- Industry leading geo-dispersed scanning platforms
- Available as quarterly or one-time service
