

MerIT

Phishing Simulation, Awareness, and Training

Available as self-managed or managed service, MerIT PhishCamp provides comprehensive phishing simulation, awareness, and training in an Easy-to-use and feature rich cloud based portal. With its intuitive template editor and vast template library, creation of custom emails to mimic real-world attacks has never been easier. Whether targeting single users or groups via one time or recurring campaign, PhishCamp provides in-depth analytics and reporting, multiple on-demand training enrollment options, and flexible pricing with either price per-email or unlimited messaging per-client.
