MerIT VISION *AI*

AI Driven SIEM-XDR-NDR

Leveraging the power of AI, MerIT Vision AI's unified SIEM/XDR/NDR offers cutting edge intrusion detection, behavioral and log analysis, file integrity monitoring, security analytics, and decisive, customizable instant active response and notification across on-premises, hybrid, and cloud environments workloads. Gone are the days of relying on 24/7 Security Operations Centers (SOCs) to receive, acknowledge, and notify customers of potential threats. When every moment counts, MerIT Vision AI's powerful AI eliminates the need for human intervention, reduces the risk of delay and error, and provides instant threat assessment, notification, and customizable proactive responses assuring immediate and decisive actions to thwart further exploitation and harm to data, infrastructure, and business continuity.

VISION AI KEY FEATURES

Powerful

- 24/7 network & system activity monitoring for potential threats
- Detects malware, vulnerabilities, and anomalies in real-time
- Provides intrusion detection (HIDS & NIDS) and threat integration
- File Integrity Monitoring (FIM)
- Scans OS and IOT endpoints for CVEs and integrates with OVAL, NVD risk databases
- Supports Windows, Mac, and Linux systems
- Auto response such as blocking Ips, killing malicious processes, and customizable policy enforcement
- No need for expensive third party MDR or EDR = cost savings!
- Helps PCI DSS, GDPR, HIPAA, NIST, and ISO 27001 compliancy

World Class **SERVICE**

- Free Deployment
- Managed Service
- 90 day default retention
- 24/7 Engineer response
- MerIT owned assets
- No licenses
- No hidden fees
- No leaving the customer to fend for themselves!
